Dear

I am enclosing herewith two memoranda - one presenting in written form the substance of my talk with you and Mr. Dulles a short time ago, the other is a statement of my present thinking regarding a possible solution to the problem stated in Memorandum I.

At the same time I am sending to Allen Dulles copies of "Do Economists Understand Business" and "Bias Against Business" which as I understand it he is going to turn over to you. If by any chance you would like copies for yourself, let me know and I shall be happy to send them.

I am also sending you under separate cover a copy of the second edition of "Money, Men and Machines." This contains three chapters written by Dr. Charles F. Roos just before his death for the purposes stated on page 9 of the Preface. I hope very much that you will take time to read these three chapters and that you will then let me have your reaction and comments.

With cordial regards,

Yours faithfully,
